

Curriculum Vita

Deborah Gail Tatar

Address: 2202 Kraft Dr., Room 123
Blacksburg, VA 24060

Phone: (540)231-8457
Email: tatar@cs.vt.edu

Education

Stanford University, Stanford, CA. 1990-1998

Ph.D. Psychology, received Jan. 1998. Doctoral thesis: Social and Personal Effects of Preoccupied Listeners. Thesis Advisor: Leonard M. Horowitz. Thesis Committee: Herbert H. Clark, Robert Zajonc (deceased), Lee Ross, and Thomas Walker (Linguistics). Chief areas of interest: attentional engagement, trust, effects of technology, psycholinguistics.

Harvard University, Cambridge, MA. 1977-1981

B.A. received June 1981. Cum Laude in General Studies. Concentration: English and American Literature and Language. Course Work in math and science. Founding member Harvard-Radcliffe Cognitive Sciences Society.

Current Position

Virginia Tech Associate Professor August 2003-present

Associate Professor of Computer Science and, by courtesy, Psychology. Fellow, Institute for Creativity, Art & Technology. Member, Center for Human-Computer Interaction. Member, Program for Women and Gender Studies. Tenure granted: June, 2008.

Honors and Awards

March, 2015

Coach, Winning team, "Caring for the Caregiver Hackathon", sponsored by the Lindsay Center for Innovations in Caregiving. Project name: CareFood.

September, 2014

Fellow, Virginia Tech, Institute for Creativity, Art and Technology

June, 2012

Best Paper nomination. Wang, R. R., Quek, A., Tatar, D., Teh, J., K. & Cheok, A., Keep in Touch: Channel, Expectation and Experience. *CHI 2012*.

June, 2004

Best Paper. Roschelle, J., Penuel, W. R., Yarnall, L., Shechtman, N. & Tatar, D. (2004). Handheld tools that "informate" assessment of student

learning in science: A requirements analysis. *Proceedings of the Second IEEE International Workshop on Mobile and Wireless Technologies in Education*, JungLi, Taiwan, pp. 149-153. Reprinted *Journal of Computer-Assisted Learning*, 21(3), pp.190-203.

January 1995

Research grant, Center for Conflict and Negotiation, Stanford University

June 1992 - August 1992

Summer fellowship. Center for the Study of Language and Information, Stanford University.

September 1994 - September 1995

Stanford Graduate Fellowship, Stanford University.

September 1990 - September 1992, September 1993- 1994

National Science Foundation graduate student fellowship.

June 1981

Radcliffe College Elizabeth Cary Agassiz Certificate of Merit for high academic achievement.

PUBLICATIONS

Books and Monographs

1. Tatar, D. *A Programmer's Guide to Common LISP*. 1986. Digital Press: (Bedford, MA). 337 pages. A text on the Common LISP programming language aimed at advanced and experienced programmers. Translated into Japanese.

Book Chapters

1. Yglesias, S., Tatar, D., Harrison, S. and Lee, J. S. (in press) Balancing Behaviors: A Design Phenomenology for Couples' Argumentation Via Different Media. In (S. Tettagh, Ed.) *Emotions and Technology*. Amsterdam: Elsevier.
2. Dickey-Kurdziolek, M. and Tatar, D. (2012) "They Need to be Solid in Standard Skills First": How Standards Can Become the Upper Bound, In (S. Hegedus and J. Roschelle, Eds.) *The SimCalc Vision and Contributions: Democratizing Access to Important Mathematics*. Dordrecht: Springer. p. 299-318
3. Harrison, S., and Tatar, D. (2012). "Design and the Third Paradigm" in Hartson, R., and Pyla, P. *The UX Book: Process and Guidelines for Ensuring a Quality User Experience*, Morgan Kaufmann, p. 254-256
4. Burge, J., and Tatar, D. (2009) Affect and Dyads: Conflict across Different Technological Media. In (S. Harrison, Ed.) *Media Spaces: 20+ Years of Mediated Life*. New York: Springer-Verlag. p. 127-146.

5. Roschelle, J., Tatar, D. and Kaput, J. (2008) Getting to scale with innovations that deeply restructure how students come to know mathematics and science. In Kelly, E. A. and Lesh, R. (Eds.) *Handbook of design research in mathematics, science and technology education*. Mahwah, NJ: Erlbaum. pp. 149-171.
6. Patton, C., Tatar, D. and Dimitriadis, Y. (2008) Trace Theory, Coordination Games, and GroupScribbles. In (J. Voogt and G. Knezek, Eds.) *International Handbook of Information Technology In Primary and Secondary Education*. New York: Springer.
7. Tatar, D., Lin, S. and Lee, J.S. Playground Games and the Dissemination of Control in Computing and Learning (2008). In (DiGiano, C., Goldman, S. & Chorost, M., Eds.) *Educating Learning Technology Designers*. Mahwah, New Jersey: Lawrence Erlbaum Associates. p. 230-257
8. Roschelle, J., Patton, C. and Tatar, D. (2007) Designing Networked Handheld Devices to Enhance School Learning. In (M. Zelkowitz, Ed.) *Advances in Computing*, New York: Academic Press, 70, p. 2-52.

Grants

September, 2013

NSF IIS-1353723. \$115, 972. EAGER: Designing Reflective Opportunities in Human-Computer Interaction. Support an experiment in changing user perception and behavior with respect to human control in a collaborative situation. (D. Tatar, PI; S. Harrison, Co-PI), 9/15/13-8/31/14.

November, 2012

VT ICAT grant. \$25,000. FractionalDrumming: introducing the manipulation of fractions to 4th to 7th graders using electronic drumming. (D. Tatar, PI; S. Harrison, co-PI), 1/4/13-6/31/13.

October, 2011

NSF CE21. \$199, 998 + REU Supplement \$24,000. CNS-1132227. Planning Grant: Integrating Computational Thinking Into Middle School Curriculum. (D. Tatar, PI; C. Corallo, co-PI, D. Kafura, co-PI; M. Perez-Quinones, co-PI; S. Harrison, co-PI), 10/1/11-1/31/15.

March, 2011

VT Institute for Society, Culture and Environment Summer Scholars Program. \$18,000. The Human Dynamics of Violence Prevention. (Ridgwell, D., PI; Jayaram, L., Co-PI; Ivory, J. co-PI; Geller, S., co-PI; Smith, C., co-PI; McConnell, K., co-PI), 3/9/11-6/15/11.

September, 2010

NSF HCC. \$493,665. IIS-1018607 HCC-Small: Human Micro-Coordination in a World of Pervasive Computing: Understanding Emotional, Personal, Interpersonal and Behavioral Interconnections. (Tatar, D., PI; Harrison, S., Co-PI), 9/1/10-1/31/14.

September, 2008

NSF CPATH. \$120,000. IIS-0829625 Distributed Expertise In Enhancing Computing Education Computing Education With Connections To The Arts. Redesigning courses in Computer Science to involve cross-disciplinary and cross-institutional projects (Perez-Quinones, M., PI; Harrison, S., Co-PI; Tatar, D., Co-PI), 9/08-10/14.

April, 2008

NSF IIS-ITR \$193,641. Creative IT. Examining Creativity with IT in Engineering Design (X-CITE). Redesigning and studying the introductory Engineering Education course. (Johri, A., PI; Lohani, V., Co-PI; Tatar, D., Co-PI), 8/1/08-7/31/10.

December, 2006

NSF BFA DGA. \$33,185. Human-Computer Interaction Doctoral Research Consortium at ACM CHI 2007: Human Factors in Computing Systems. Support for Doctoral Consortium. IIS-07-7398. (D. Tatar, PI), 12/05/06-11/30/07.

April, 2006

NSF SGER. \$103,839. Embodied Communication: Vivid Interaction with History and Literature. Create computationally supported embodied experiences in collaboration with multi-institutional, multi-disciplinary teams. IIS-0624701. (F. Quek, PI; W. Winchester, Co-PI; D. Tatar, Co-PI), 4/1/06-3/31/08.

March, 2006

NSF CRI. \$399,999. Interfaces for the Embodied Mind. IIS-0551610. Equipment to support the exploration and development of embodied interaction. (F. Quek, PI; D. Tatar, Co-PI), 3/15/06-5/1/07.

September, 2004

NSF Interagency Education Research Initiative Phase II Grant. \$5,983,000. Working with Teachers and Leveraging Technology to Scale Opportunities to Learn More Complex and Conceptually Difficult Middle School Mathematics. Large-scale controlled, rigorous testing of math teachers using or not using a technology for teaching the math of change and variation (SimCalc) in replacement units. REC-0437861. (J. Roschelle, PI; D. Tatar,

Co-PI; B. Hopkins, Co-PI; S. Empson, Co-PI; S. Hegedus, Co-PI), 9/1/04-8/31/08.

September, 2004

NSF ITR/IERI Grant. \$1,308,820. Tuple Spaces as a Foundation for Collaborative Learning. Explores the application of core distributed systems techniques to the coordination of multiple learners in distributed collaborative educational activities REC 0427783. (J. Roschelle, PI; C. Patton, Co-PI; S.R. Chaudhury, Co-PI; D. Tatar, Co-PI), 9/1/04-8/31/06.

September, 2002

Interagency Education Research Initiative Phase I Grant. \$1,000,000. Scaling Up SimCalc: Professional Development for Integrating Technology to Teach More Complex Mathematics. Piloting and instrument development for rigorous experimentation with math teachers. REC-0228515. (J. Roschelle, PI; D. Tatar, Co-PI; J. Kaput, Co-PI; B. Hopkins, Co-PI), 9/1/02-8/31/04.

January, 2002

NSF EHR \$1,700,000. Handheld Assessment: Portable Scaffolds for Project-Based Learning in Science Inquiry? Participatory design with teachers in Beaufort South Carolina of hand-held tools for formative inquiry in science. NSF REC-0126197. (W. Penuel, PI; D. Tatar, Co-PI; L. Yarnall, Co-PI; J. Roschelle, Co-PI), 1/1/02-12/31/04.

December, 2000

IERI Planning Grant. \$116,123. Planning a Rigorous Experimental Trial of SimCalc's Approach to Increasing Access to Complex Mathematical Ideas. Prepared for Phase I and current Phase II rigorous experimentation through work defining the intervention and key scaling questions. NSF-REC 0089094. (J. Roschelle, PI; D. Tatar, Senior Personnel), 12/15/00-2/28/02.

October, 2000

NSF ROLE. Understanding Math Classroom Affordances of Networked, Hand-Held Devices. The NetCalc project developed and utilized handheld-based technology to support learning and teaching the math of change and variation. It showed highly significant results in both high and low-SES 8th grade classrooms. REC-0087771. (J. Kaput, PI; J. Roschelle, Co-PI; D. Tatar, Senior Personnel) Total: \$1,500,000 (SRI: \$683,578), 10/1/00-9/30/04.

Professional and Teaching Experience

Virginia Tech

Associate Professor

August 2003-Present

CS4784 HCI Capstone class. A design oriented class to engage graduating seniors with a project of their own devising from ideation through implementation and user data gathering.

CS4984/CS6944 Designing Integrated Computational Thinking Activities. A combined graduate/undergraduate course to structure engagement in participatory design activities with teachers in Henrico County Public Schools.

PSYC5433. Cognitive Psychology. A graduate introduction to cognitive psychology.

CS1124. Introduction to Media Computation. An introduction to computing through manipulating media, intended to increase diversity in computing.

CS1614. Introduction to Living in the Knowledge Society. A freshman introduction to computing concepts as they appear in society, for non-majors.

CS 6724. Designing Coordinated Activities. This new graduate course allows students to learn about theories of coordination and the design and implementation of coordinated activities.

CS 5984. Research Methods for Applied Inquiry about Humans. This new graduate course is designed to give graduate student in computer science exposure to values, principles and pitfalls in various social science research methods.

CS 4984. Designing Tuple-Based Cooperative Activities for Learning. This new project-based class allows undergraduates to learn about the design and implementation of coordinated learning activities using Tuple spaces and handhelds.

CS 3604. Professionalism in Computer Science. In this writing intensive class, students learn how to make and analyze ethical and persuasive arguments, as well as the typical expectations potential employers have for new employees. In Fall, 2011, I started an emphasis on reading and summarizing articles as a pathway towards improved writing. In Spring, 2009, students conducted joint projects with students at the University of Limerick in Ireland. In Fall, 2005, I introduced a classroom response system that allowed students to contribute anonymous text messages to a common workspace as a way of finding out more about student thought and opinions.

CS 5734. Computer-Supported Cooperative Work. Graduate students learn how to create and analyze applications for multiple people. Pervasive and ubiquitous as well as small group applications and methods are examined.

CS 5724. Models, Theories and Frameworks of Human-Computer Interaction. (Graduate)

Center for Technology in Learning. Participated in winning four NSF grants as co-PI or Senior Personnel. Research on Online Communities for Learning; handheld, wireless computers for mathematics education and for formative assessment; rigorous experimentation in classroom settings.

Stanford Poynter Project *Research Associate* *Sept.1998-April 2000*
Investigated the processes of reading newspapers on the World Wide Web, in conjunction with the development of novel software for interpreting eye-tracking data. With Professor Marion Lewenstein, Department of Communication, Stanford University.

Shyness Clinic *Research Co-therapist* *May 1998-Dec. 1998*
Co-therapist in a 26-session cognitive-behavioral shyness/social phobia treatment group. With Lynne Henderson, Ph. D., Head of the Shyness Clinic.

NSF Web Security Project *Consultant* *Sept.1998- April 2000*
Investigated people's attitudes towards security on the World Wide Web. With Dr. Batya Friedman, Department of Computer Science, Colby College.

Stanford University *Lecturer* *June 1998 - August 1998*
Taught Introduction to Social Psychology.

Stanford University *Lecturer* *April 1998 - June 1998*
Taught undergraduate seminar on Language and Deception.

Stanford University *Research Assistant* *Sept.1996- June 1997*
Investigated the effects of different screen sizes and viewed contents on recipient physiology (heart rate and skin conductance) and reported reaction. With Byron Reeves, Department of Communication.

Stanford University Teaching Assistant *Sept.1991 - June 1995*
Introductory Psychology, Introductory Statistics, Social Psychology (Head TA), Psycholinguistics (lectured on Memory for Discourse and Representation in Spatial Models) and Cognitive Psychology (lectured on Language Comprehension). Guest Lecturer on Politeness, in Language and Thought.

Stanford University *Lecturer* *Summer, 1993*
Supervised student readings on Psychology and Language.

Xerox EuroPARC and PARC *Consultant* *June 1991 - Aug.1991*
Designed and ran a psychological study evaluating the collaborative properties

of an electronic whiteboard that permitted joint work between people at different sites.

Xerox PARC *Member of the Research Staff Jan.1986- Jan.1989*

Worked on Colab, a seminal project in the area of Computer Supported Cooperative Work. Used video to study groups of people interacting with one another and with machines in the Colab setting. Founded and ran a working group to explore the relationship of design and video-based observational work. Supervised summer students. Designed and developed a system for logging and examining Colab machine events and connecting them to video recordings. Co-designed Sketchtool, a multi-user sketching tool, and Cnoter, a multi-user idea organizing tool. Organized workshops leading to a policy statement on use of videotape records of human subjects.

Consultant

Co-design, development, and support of Wegions, an object oriented package for specifying the constrained layout and update behavior of nested window regions on the screen.

Lucid, Inc. *Consultant Summer, 1990*

Menlo Park, California

Taught intensive two-week computer science course.

EuroPARC *Dec.,1987*

Cambridge, England

As a liaison from Xerox PARC, taught a series of three two-hour classes on programming and using our novel computer systems.

Digital Equipment Corporation Senior Software Engineer *July 1984- Jan.1986*

Burlington, MA

Senior member of a team implementing a novel screen-oriented text editor with graphic and video capabilities for use in course development and delivery.

Digital Equipment Corporation Course Writer and Developer *July 1983- July 1984*

Nashua, NH

Developed and taught an intensive two-week computer science course for engineers.

Educational Computing Group *Administrative Assistant Feb.1982 - July 1983*

M.I.T. *Cambridge, MA*

Taught the Logo programming language to high school students at the Cotting School for the Handicapped. Taught a Logo course to secretaries in the Laboratory for Computer Science. Programmed an experimental language.

Centre Mondiale pour *Consultant July 1982 - Aug.1982*

L'Informatique et

Paris, France

Resources Humaine

15. 2005, 2008, 2009 Lead, Human-Computer Interaction Qualifying Exams
16. 2004-2005, Departmental Search Committee for Senior Professor/Head of Center for Human-Computer Interaction

Professional and Service Activities Outside Virginia Tech

International research collaborations

1. Teaching Computational Thinking. September 2014. Aarhus Universitet, Denmark.
2. DRG-NSF Early Career Workshops, 2001-2003. Meeting in Tübingen, Germany, October, 2001 and in Tampa Florida, 2003. This resulted in a publication with international collaborators.
3. Tuples Project International Workshop on Development, SRI International, June 2005, Student and faculty attendees from including Spain, Singapore, Taiwan, Chile, China, and Korea. This resulted directly in two publications with international collaborators.

Other international activities

1. Visiting team, VT College of Engineering-Nottingham University, January 14-18 2013. Helping pave the way for joint work.
2. Visiting team, VT College of Engineering-Technische Universität Darmstadt, June 28-July 2, 2004. Helped pave the way for joint proposals and the establishment of a joint Master's program between Mechanical Engineering departments at the two schools.

Professional service accomplishments

ACM SigCHI Conference on Human-Computer Interaction

1. Session Chair, ACM SigCHI Conference on Human-Computer Interaction, 2014
2. Invited Mentor, ACM SigCHI Conference on Human-Computer Interaction, 2014 14th Women's Breakfast
3. Associate Chair for Papers, ACM SigCHI Conference on Human-Computer Interaction, 2014
4. Associate Chair for Papers, ACM SigCHI Conference on Human-Computer Interaction, 2013
5. Associate Chair for Papers, ACM SigCHI Conference on Computer-Supported Collaborative Work, 2012
6. Associate Chair for Papers, ACM SigCHI Conference on Human-Computer Interaction, 2011
7. Associate Chair for Papers, ACM SigCHI Conference on Human-Computer Interaction, 2009
8. Co-Chair (with Tom Rodden), Doctoral Consortium, ACM SigCHI Conference on Human-Computer Interaction, 2007
9. Associate Chair for Papers, ACM SigCHI Conference on Human-Computer Interaction, 2007
10. Session Chair, ACM SigCHI Conference on Human-Computer Interaction, 2007, 2005
11. Co-Chair (with Steve Harrison), Workshops, ACM SigCHI Conference on Human-Computer Interaction, 2006 (Note: organized and ran 24 workshops)

12. Associate Chair for Paper, ACM SigCHI Conference on Human-Computer Interaction, 2005
13. Reviewer, ACM SigCHI Conference on Human-Computer Interaction, perennially since 2004 and sporadically before then; reviewers for Workshops, 2011, 2012.
14. Vice Chair, BayCHI, June-January 2003-2004
15. Review Panel, tutorial proposals for 1990 Conference on Computer Human Interaction.

Other Conference and Workshop and Committee Organizational Roles

16. Program Committee, Fifth Aarhus Decennial Conference, Critical Alternatives
17. Program Committee, EC-TEL 2015 (European Conference on Technology Enhanced Learning)
18. Program Committee, GBS 2016 (Gender, Bodies and Society)
19. Workshop Co-Chair, DIS 2014 (Design of Interactive Systems)
20. Program Committee, GBS 2014 (Gender, Bodies and Society), Introduced plenary speaker
21. Program Committee, EC-TEL 2014 (European Conference on Technology Enhanced Learning)
22. Program Committee, EC-TEL 2013 (European Conference on Technology Enhanced Learning)
23. Program Committee, EC-TEL 2012 (European Conference on Technology Enhanced Learning)
24. Program Committee, IDC 2012 (Interaction Design for Children)
25. Program Committee, Gender, Bodies and Technology Conference, 2011, 2012
26. Website Committee, International Society of the Learning Sciences, 2011-current
27. Program Committee, DESIRE 2011
28. Communication Committee, International Society of the Learning Sciences, 2008-2010
29. Program Committee Member, International Society for Design and Children 2010
30. Senior Program Committee Member, WMUTE 2010
31. Senior Program Committee Member, International Conference on Computers in Education, ICCE 2008, Conference on CUMTEL & DIGITEL, Taiwan, October 27-31, 2008.
32. Review Board, WMUTE, IEEE Wireless Mobile Ubiquitous Technology in Education, 2008
33. Organizer, Stanford-Berkeley Social-Personality Talks, May 1996
34. Organizer, Stanford-Berkeley Cognitive Talks, April 1992
35. Treasurer, SigCHI Workshop on Video as a Research and Design Tool (January, 1989)

Journal Reviewing Activity includes:

36. JOPP (Journal of Peer Production), ICT (International Journal of Creativity and Technology), Interacting with Computers, Human Computer Interaction, IEEE Transactions on Learning, Journal of the Learning Sciences, Social Studies of Technology, IEEE Computer, Transactions on Computer-Human Information (ToCHI), Information Systems Research, International Journal of Man-Machine

Studies, Transactions on Office Information Systems, Journal of Learning and Individual Differences

Proposal Reviewing Activity

37. NSF expert reviewer, 2004, 2005.
38. NSF proposal review panels: 2003-2009, 2013, 2015.

Conference Reviewing Activity

39. I have regularly reviewed for the following conferences: Winter Conference on Text and Discourse, Computer-Human Interaction, Computer-Supported Collaborative Work, DIS, GROUP, American Educational Research Association, International Conference of the Learning Sciences, and Computer-Supported Collaborative Learning

Other Reviewing Activity

40. Cambridge University Press, 2013
41. Oxford University Press, 2013
42. Government of Canada grant proposal review, 2012
43. Book reviewer, 2005, Springer-Verlag.

Executive Boards

1. International Society of the Learning Sciences, 2007-2013

Advisory Boards

1. SmartGraphs Staudt, C., Zucker, A.. Concord Consortium
2. The James J. Kaput Center for Research and Innovation in STEM Education
3. CATAALYST project. PI: Jeremy Roschelle. Co-PI: William Penuel. SRI International. Funded by the National Science Foundation.
4. ITR: Value Sensitive Design -- Integrating Values into the Design of Information and Computer Systems. PI: Batya Friedman; Co-PI Peter H.Kahn, Jr. University of Washington. Funded by the National Science Foundation.
5. Representation, Participation and Teaching in Connected Classrooms, P.I.: J. Kaput; Co-PI: S. Hegedus. Funded by the National Science Foundation.
6. IIS project, Digital Libraries Curriculum Development.
7. CRA ICLS NSF Cyberlearning Workshop Advisor, March 24-25, 2005.
8. American Library Association--University of Washington Information Technology Policy Symposium on Internet Credibility. April 11-13, 2005.
9. Mentor, Contextual and Organizational Issues in Human – Computer Interaction Stanford School of Engineering (MS&E430/CS247B), 2000-2003
10. Technical Advisory Board, Project Perseus, Harvard University, 1986-89.

Diversity Orientation

1. *CS Diversity Committee*: Member: 2009-current; chair, 2014-2015, Spring 2012
2. *Student Supervision*: The Department of Computer Science at Virginia Tech is less than 6%-9% female and less than 5% African-American at the undergraduate

level and only slightly better at the graduate level. By early 2009, in this context, 7/18 of the undergraduate projects I had supervised have been conducted by women, and 2/18 with African-Americans. I had also supervised two graduate women, one of whom won an IBM Fellowship and the other an NSF Graduate Student Fellowship. I also graduated another female African-American student in education. Both African-American women went on to prestigious post-docs at Pennsylvania State and University of Iowa.

3. *Association for Women in Computing (AWC):*

I have been the faculty advisor for the Association for Women in Computing (AWC) since 2004.

Early on, this was not only a support group, but also raised money to support activities. In recent years, money raising has been handled by the VT Computer Science Research Center, so support activities have become more prominent. In addition to professional meetings and social activities aimed at college students, the AWC runs an annual Women in Computing Day, now in its 17th year, which brings 100 local 7th grade girls and their teachers to visit the Computer Science department. Additionally, it sends undergraduate and graduate women to the Grace Hopper Celebration of Diversity each year, often sending 12 to 14.

4. *Research Orientation:* My research is oriented towards diversity and equity in several ways. My work with feminism is concerned with inequity and the distribution of power. I recently concluded work promoting computational thinking in Henrico County Public Schools, a mixed SES school district. My students have studied the roles of socio-economic standing and ethnic matching on the effects of the SimCalc educational intervention and a number of other different kinds of technologies in education. SimCalc, a major focus of my research, is itself designed to reduce inequity. My projects have used it in some of the poorest regions of the United States. The distributed technologies that I have been working on are designed to promote equitable participation and human-valued interaction. The design techniques that I have been advocating premit diverse values and value on diversity.

Doctoral Students (graduated)

Direct Advisees

1. Lee, Joon-Suk (Spring, 2013) *Micro-coordination: Looking into the details of face-to-face coordination.*
2. Dickey-Kurdziolek, Margaret (Spring, 2011) *Classroom Resources and Impact on Learning.* Department of Computer Science. NSF Graduate Student Fellow.
3. Lin, Sirong (Fall, 2011) *Programmer Cognition in Explicit Coordination Modeling: Understanding the Design of Complex Human-Computer Interaction and Coordination.* Department of Computer Science.
4. Stroter, A. (Summer, 2008) *Racial and Ethnic Teacher-Student Congruence.* Department of Education, Curriculum and Instruction.
5. Burge, Jamika D. (Summer, 2007) *Communication of Emotion in mediated and technology Mediated Contexts: Face-to-Face, Telephone and Instant Messaging.* Doctoral Dissertation. IBM Fellow. Department of Computer-Science.
6. Kim, Kibum (Spring, 2007) *The Effects of Handheld Network Service "Look" on the Acquisition of Common Ground.* Department of Computer-Science

Committee Member

Ben Hanrahan, Tejinder Judge, Laurian Vega, Francisco Olivera, Regis Kopper, Glenn Fink, Scott Turner, Purvi Saraiya, William Plymale (ECE), Antony Allevato, Alexander Endert

Master's Students (Awarded)

Direct Advisees

1. Michael Stewart (2012) Master's Thesis: *How Private is Private?: Effects of Varied Transparency on Group Ideation*
2. Robert Beaton (2012) Master's Thesis: *On Digital Drumming: Collaborative, Dyadic, Co-Located, Coordinated Interaction*
3. Nouf Alaloula (2010) Master's Thesis: *Framing Coordination in Collocated Computer-Mediated Communication*
4. Matthew Schaefer (2009) Master's Thesis: *On PlaceMark: Collaborative Authoring, Place, and Identity*
5. Margaret Dickey-Kurdziolek (2007) Master's Thesis: *Educational Technology and Teacher Perceptions: How does the technology fare in the wild?* NSF Graduate Student Fellow.
